

TARUN SK

MERN STACK DEVELOPER

murugatarun9787@gmail.com | +91-9363501944 |  Tarun SK |  TarunSK2002

TECHNICAL SKILLS

Frontend

- React.js
- HTML5
- CSS3
- JavaScript (ES6+).

Backend

- Node.js
- Express.js
- RESTful API Development

Database

- MongoDB
- Mongoose ODM
- MySQL
- Microsoft SQL Server

UI/UX

- Figma

SOFT SKILLS

- Client Handling
- Requirement Analysis
- Project Planning
- Effective Communication
- Time Management
- Structured & Logical System Design
- Adaptability & Continuous Learning

SUMMARY

MERN Stack Developer with practical experience in building and deploying full-stack web applications using MongoDB, Express.js, React.js, and Node.js. I enjoy designing scalable APIs, working with MySQL and MongoDB, and creating secure role-based authentication systems. On the front end, I focus on building responsive, user-friendly interfaces with React and Material-UI. On the back end, I bring expertise in middleware, controllers, and route management to ensure reliable performance. I value collaboration, problem-solving, and writing maintainable code that delivers real impact.

PROFESSIONAL EXPERIENCE

Misoftware Solutions –Full Stack Developer

Mar 2025 - Present

- Developed 6+ full-stack web applications using React.js, Node.js, Express, MySQL and MongoDB.
- Designed RESTful APIs and implemented role-based admin and customer dashboards.
- Built responsive UIs with Material UI, Formik, and Yup for validation and usability.
- Integrated file uploads, e-commerce modules, and reporting dashboards.
- Optimized database operations using SQL joins, CRUD logic, and performance tuning.
- Collaborated with teams using Git/GitHub for version control and project delivery.

PROJECTS

HRMS – Frontend Development

Sep 2025 - Present

- Developed dynamic and responsive HRMS modules using React.js, Material-UI, and Bootstrap for seamless user experience.
- Integrated .NET Web API endpoints via Axios for real-time CRUD operations and data synchronization.
- Implemented role-based navigation and access control (Admin, HR, Employee) using React Router.
- Managed complex application state efficiently with Redux, especially for payroll and attendance workflows.
- Collaborated with backend teams to ensure smooth API integration and consistent data flow across modules.

PUVIAGAM (Smart Home Automation)

Nov 2025 - Present

- Rebranded and customized Home Automation into a standalone smart automation product named Puvigam, ensuring consistent branding across OS, UI, and user-facing components.
- Prior embedded systems knowledge to integrate automation logic with hardware components, ensuring reliable communication between sensors, actuators, and the automation controller.
- Worked on building a unified automation ecosystem comprising a branded operating system, web interface, and mobile applications operating on shared automation rules.
- Implemented rule-based, input-driven automations enabling real-time device control based on sensor values, thresholds, and predefined conditions.
- Contributed to practical automation use cases such as smart temperature control and water level management, focusing on system stability, scalability, and real-world usability.

EDUCATION

M. Kumarasamy College of Engineering

Nov 2020 - Apr 2024

- Bachelor of Engineering in Electronics and Communication Engineering.
